## POPCORN VENDING MACHINE TECHNICAL DATA SHEET

### Characteristics

**Model:** 150\_US  
**Autonomy:** 250 portions of 1,59oz of corn  
**Flavors:** 3  
**Corn containers:** 2 of 24 lb each  
**Capacity:** 2 x 24 lb of corn and 250 cups  
**Type flavors:** Salty, sweet & mixed  
**Cups dispenser:** 1 of 250u.

### Functioning

When paying for the ration by means of bills or cashless, the popcorn flavor is chosen, sweet, salty or Mixed, and the machine delivers a cardboard cup that the user has to open and place in the popcorn outlet, then preheats the air to 374°F temperature and doses 1,59oz of corn to the cooking unit, the process time (75sec.) begins to count from this moment, as the corn expands to "popcorn", the machine expels it to the "popcorn", starts counting from this moment, as the corn expands to "popcorn", the air from the heater itself expels it to the cardboard cup. At the end of the process, the machine performs an energetic air blowing to clean the heater.

## PRODUCT

Our star product is undoubtedly the CORN with FLAVOR, TAM has the world patent of its elaboration. The production system, unique in the world, consists of adding flavor inside the grain of corn without exploiting it. This process makes the popcorn totally healthy, since we select the best corn to produce a quality product, without added oils or fats. FLAVORS: extra salty and sweet Caramel.
